Fifth Meeting Notes for C3

11/27/2019

Budget

5-10 dollars per month to be part of the Alexa for business plan per Alexa device. Initial set up costs $100. Add any additional charges that have not been determined yet: $500 total. If only Alexa is used, not for business or hospitality, then there are no usage charges.

Should users sign in every time?

- Authentication could be used once. Afterwards, train Alexa to recognize the users voice.
- Send a passcode to the users' phone, have them say the passcode to Alexa.

Databases

- Need to read from the database, not write.
- Access a database that holds students connection card balances, another that holds student information such as their name, phone number, and student ID number, and one that holds CWU events and activities.
- Access to CWU Canvas to access Students class schedule and assignments.
- Create our own Database to hold FAQs
